COUNTER-TOP STAND SYSTEMS

Soapopular® Counter-Top Stand Systems improve access to Hand Hygiene products for guests, staff, and patrons to use in high-traffic and frequent use areas, helping to reduce the spread of germs and bacteria in peak contact zones.

For locations with limited space on walls or floors, Soapopular® Counter-Top Stands can be placed on flat desk/table surfaces for ease of use and convenient placement to access hygiene products when needed.

Each Counter-Top Stand is equipped with our Automatic Foam Dispenser, providing 2,600 foam applications between refills.

- Made using Durable Aluminum, our Counter-Top Stands are designed to tackle high-traffic and frequent use areas prone to germs/bacteria.
- Can be placed on flat level surfaces around your facility as needed to offer convenient access to hand hygiene products such as: tables, desks, and counters.
- Our Dispenser Counter-Top Stand includes bevelled base to catch accidental user drips and spills, reducing messes and slippery surfaces.
- Soapopular® Automatic Foam Dispensers provide 2,600 applications using a built-in Infrared Sensor, giving users access to hand sanitizer without touching the dispenser.

Soapopular® Dispenser Counter-Top Stands provide another avenue of hand hygiene for staff, patrons, and visitors to use especially in high-traffic areas where hand contact is common on surfaces prone to germs and bacteria.

Counter-Top Stand Features
